Platform, Product, & AI Experience Leader

Product Design executive with 20+ years of experience leading UX strategy for complex enterprise platforms, high-performance design organizations, and 0→1 AI ecosystems. Proven track record transitioning legacy SaaS into intelligent, agentic workflows and scaling global design functions to deliver measurable business value (\$300M+ impact). A trusted partner to C-suite and product leadership, skilled at aligning experience strategy with enterprise trust, platform governance, and product-led growth.

Career Highlights

- **Engineered and executed the platform-level AI design strategy for the fastest-growing product family** in ServiceNow history, contributing \$300-\$350M in annualized ARR and accelerating cross-functional adoption by 61%.
- **Co-founded ServiceNow's AI approval committee** alongside the Chief AI Architect, Legal, Data Science, and Product leaders; launched evaluation standards for responsible AI that reduced design revision cycles by ~30%.
- **Anchored ServiceNow through a high-pressure global restructuring**, maintaining an 88% employee engagement score by redesigning operating rhythms and instituting a development framework for first-time managers.
- **Unblocked stalled engineering pipelines across 6+ ServiceNow business units** by architecting the AI pattern framework that balanced product flexibility with consistency, creating the company's blueprint for AI pattern scaling.
- **Spearheaded platform consolidation and digital modernization efforts at Veritone** to replace fragmented legacy workflows with intelligent, automated systems, boosting efficiency by 55%.

Areas of Expertise

Enterprise AI & Platform Strategy: 0→1 Generative AI Patterns • Agentic Workflows • Responsible AI Frameworks • Platform Architecture • Model & Prompt Alignment

Executive Leadership & Governance: Executive Influence & Storytelling • Business Impact & ROI • High-Performance Team Building • 0→1 Product Incubation • Cross-Functional Leadership • Organizational Design & Change Management

Scale & Talent Development: Design Operating Models & Governance • Design Systems & Quality Standards • Organizational Enablement • Experience Frameworks • Rapid Org Scaling (15 to 62) • Global Team Management

Experience

FREELANCE, Dec 2025 – Present

Strategic Advisor, Product Design, Costa Mesa, CA

- Define human-centered AI experience strategy across ad tech and real estate technology, translating emerging AI capabilities into practical, user-centered product decisions.
- Partner with early-stage founders and engineering leadership on UX strategy and workflow optimization; guided an ad tech platform team through an onboarding redesign, reducing completion time from 1.5 hours to 15 minutes.

SERVICENOW, Sep 2021 – Dec 2025

Sr. Manager, AI Product Design, Costa Mesa, CA

- Recruited to spearhead Conversational Interfaces, subsequently scaling the function into the company's inaugural AI Design organization from 15 to 62 practitioners.
- Partnered with executives to transition the platform from assistive chat to agentic AI, shaping early 0→1 generative AI design patterns for the fastest-growing product family in company history with \$300M+ in annualized impact.
- Coached and developed a global team of 17 designers and managers through a major restructuring; redesigned operating rhythms and built first-time manager frameworks to sustain an 88% employee engagement score.
- Established specialized Conversation Design and advanced agentic voice guidelines to govern conversational UX, seamlessly collaborating with core Content Design partners to ensure a cohesive, unified platform experience.
- Embedded intelligent capabilities into core workflows supporting 200M+ interactions and improving fulfillment speed by 10%.
- Established enterprise design standards and governance across 20+ product areas, collaborating across product lines to increase adoption by 61% and contributing \$300M to \$350M in annualized business impact.

- Launched professional development programs for 500+ practitioners, boosting design confidence by 30% and strengthening AI product design capabilities across the enterprise.
- Aligned with VP and SVP leaders across Product, Engineering, and Legal to align AI UX strategy with enterprise trust, compliance, and platform priorities across 6 high-impact initiatives.

VERITONE, Apr 2020 – Sep 2021

Director of Product Design, Costa Mesa, CA

- Unified fragmented enterprise SaaS products into a single platform experience, improving product consistency across 8 solutions and supporting 40% growth in customer adoption and monetization.
- Increased design team capacity by 75% by institutionalizing scalable UX standards, visual systems, and operating practices across the full SaaS portfolio.
- Served as the primary design advisor to the VP of Product and CEO/founder, shaping roadmap decisions and AI-driven workflows across key user journeys that improved user efficiency by 55%.
- Moved design upstream by embedding UX research and validation into early product strategy, reducing downstream rework by ~40% and improving roadmap confidence across 10+ initiatives.
- Scaled the design team from 1 to 4, promoting the initial designer to Lead in 9 months; championed professional development that empowered her to architect a net-new design system and cross-functional engineering model.

COLLABERA, Oct 2017 – Feb 2020

Director, Digital Experiences, Irvine, CA

- Built and led a global digital experience org, scaling the team from 3 to 8 to modernize platforms and launch a net-new talent marketplace spanning job seekers, recruiters, and enterprise clients.
- Transformed legacy applications into a unified internal platform experience, positioning UX as a strategic lever for operational decision-making across 5+ business functions.
- Reduced critical workflow cycles from days to minutes, increasing platform engagement by 60% through design thinking and usability validation.
- Partnered with executive leadership to align experience strategy with enterprise transformation goals and early intelligent automation initiatives across strategic programs.

CYBERCODERS (ON ASSIGNMENT), May 2012 – Oct 2017

Director, User Experience, Irvine, CA

- Owned end-to-end UX strategy for enterprise recruiting and consumer career platforms, leading large-scale redesigns that unified fragmented legacy systems into modern cross-platform experiences.
- Improved user productivity with a 40% reduction in time on task and accelerated onboarding speed by 117% through high-performance, intuitive experience design.
- Built the company's initial UX function and mentored a growing team of designers, increasing design influence on product and go-to-market decisions during a period of significant company growth, acquisition by ASGN, and subsequent enterprise scale-up.
- Redesigned CareerBliss from a job aggregator to a data-driven career platform, introducing reviews, salary insights, and culture matching; drove 37% growth in registrations and a 26% lift in applications submitted.
- Drove modernization of both enterprise and consumer-facing platforms, improving engagement, usability, and conversion across 300+ internal users and 5 core workflows.

Leadership, Advisory, & Recognition

Advisory Board Member, Strategic AI Program | University of San Francisco, School of Management | 01/2025 - Present
Partnering with academic and industry leaders to shape the future of AI strategy, ethics, and human-centered design.

Industry Speaker & Thought Leader | ServiceNow Knowledge, Women in AI, AI STRAT | 02/2023 - Present
Frequent speaker on agentic workflows, scaling AI design organizations, and responsible AI frameworks.

U.S. Patent Holder | Seller's Toolkit featuring LiveValue™ (Patent #13/023,326).
Invented a method and system for motor vehicle valuation and sales orchestration.

Award Recipient | ServiceNow Culture Champion (2022); Webby, W3, and Media Excellence Awards for UX Innovation.
